PALO VERDE UNIFIED SCHOOL DISTRICT

PVUSD_RFP_2022.11.27.EQU 1

470: #230006312

Q: Generally, from what we are seeing with school districts, they would want to Deploy WIFI6 APs but not WIFI6e APs to stay withing manufacture cycles which would impact the district's cycles. We are seeking to clarify whether the district doesn't want WIFI6 or that the district doesn't want WIFI6e which provides 6ghz, which existing devices don't support.

A: Please see p. 16 of the RFP for hardware requested: "At this time the district does not require Wifi-6 capability on proposed access points." The district is neither specifically seeking out nor deliberately excluding Wifi-6, including Wifi-6E access points.
